

# Remon® RV - Remote Monitoring

## REMON®

A brand registered to develop REMote MONitoring solutions, using best-fit technologies from the Internet of Things.

## CELLULAR CONNECTION

2G, 3G, NB-IoT, LTE-M over any available provider, so your caravan or motorhome can always connect to the internet. Alert for movement, track between mobile cells.

## WIRELESS

Standard WiFi for local connection to your smartphone.

## BATTERY MONITOR

Monitor current battery voltage and historical values to indicate trends.

## ACCELEROMETER

Continuously check for intrusion and collision. Use with your smartphone as a spirit level.

## TEMPERATURE & HUMIDITY

Detect temperature & relative humidity inside your van.

## BAROMETRIC AIR PRESSURE

Used with other sensors to detect the chance of mold development and presence of an intruder.

## WEB CONSOLE & DATABASE

Cloud-based secure platform provides access via web-browser. Secure database stores every sensor reading.

**thinnovation**

**Remon® RV provides affordable remote security and monitoring for your caravan or motorhome – now with levelling technology!**

**If you own a caravan or motorhome that is in storage for part of the year**, you will naturally have concerns about security and damage. REMON® RV will constantly monitor the status, notify issues by SMS text straight to your smartphone and maintain a detailed log accessed securely via a web browser. REMON® RV provides a comprehensive and secure solution to provide peace-of-mind.

- A cloud-based secure remote view of the status of caravan or motorhome.
- View immediate and trending data – check what happened over 24 hours, 1 week, 28 days, etc.

• Accessible from anywhere in world via a web browser.

• Secure access via username and password.

• Detect intruder, collision, or slow discharge of battery.

• Advance warning of conditions inside your van that could lead to the development of mold.

• Use location monitoring based on mobile phone cell and any available WiFi access point coverage to detect movement and location.

• Instant notification of alerts by SMS, Twitter, Facebook Messenger - even automated voice messages direct to your phone.

• Access to information that is important from anywhere via a web-browser.

• Use of very local (typically within 10km) weather stations to provide accurate weather conditions around your van throughout the UK.

• Continuous monitoring with extremely low power consumption – self-powered, so will not drain your battery, even over 1 year in storage.

• Simply connect your smartphone via WiFi to the REMON® RV device to use it as a smart spirit level with remote display to make leveling your caravan simple.
